Campaign Tracking & Reporting: UTM Link Tracking, Promo Code & QR Code Campaign Tracking, Custom Tool Development for Asset Tracking

Technical Skills: HTML5, CSS3, JavaScript, jQuery, Bootstrap, PHP, WordPress, MS Office (Excel), Photoshop, Bitly

PROFESSIONAL EXPERIENCE

Sr. Frontend Developer / Site Admin – Digital E-commerce (Tanishq) | *Titan Company Ltd.* 2022 – Present

- Manage day-to-day content updates on Tanishq's e-commerce website and app, built on Salesforce Commerce Cloud (SFCC), including homepage, campaign, and landing pages, ensuring accuracy and timely execution during regular business and high-traffic campaign periods.
- Own the end-to-end content update and website maintenance cycle — including design assets and structural changes — coordinating with design and development teams to ensure smooth, accurate deployment.
- Manage price file updates for Tanishq gold and silver coin listings on the Big Basket marketplace promotion tool, ensuring accurate and timely pricing and promotional data across the marketplace platform.
- Create and manage campaign assets (promo codes, QR codes, UTM-tagged and shortened links) to support marketing campaigns and enable accurate tracking of campaign performance.
- Conduct SEO audits and implement on-page improvements (meta tags, footer content) to keep website content aligned with SEO and brand guidelines.
- Identify and resolve website issues affecting the customer journey, including improving the web-to-app redirection flow to reduce friction for online shoppers.
- Monitor and improve website page speed (PSI) as part of ongoing website performance and quality improvement initiatives.
- Develop custom internal tools to streamline campaign asset management, improving team efficiency and turnaround time.
- Coordinate across design, marketing, and development teams to support website personalization, optimization, and timely execution of campaign updates.
